“I am a Medjet member because I know they have a proven track record of arranging evacuations for ill or injured hunters and travelers from remote locations around the world. I am a member because I know that Medjet has been delivering on their promises longer than other providers have been in business. So, if you are going to get out there, get Medjet. I wouldn't travel without it.” - *Craig Boddington*  
Hunter, Author & Safari Filmmaker

### Medjet's Experience

Since 2000, MedjetAssist has arranged 54 African transports, 14 of them remote evacuations.

### MedjetAssist Defined

A medical evacuation membership program – as a member if you are hospitalized more than 150 miles from home, MedjetAssist will arrange comprehensive medical transportation to the hospital of your choice, not just the nearest adequate facility. Peace of mind every time you travel.

### The MedjetAssist Membership

Domestic air medical evacuation averages \$25,000 and internationally, it can exceed \$100,000 but not with the medical evacuation protection of Medjet. Annual memberships are \$250 for an individual, \$385 for a family and Short-Term memberships start as low as \$95.

### The MedjetAssist Difference

- ◆ Evacuation is to the member's hospital of choice
- ◆ Worldwide network of authorized affiliates with access to over 200 aircraft
- ◆ No “medical necessity” – Neither the attending physician nor the capability of the existing facility determines the merit of an evacuation
- ◆ NO pre-existing medical condition exclusions or health questions for those below age 75. Diamond memberships are available for those age 75 to 85.
- ◆ No adventure travel exclusions, no natural disaster exclusions, no terrorism exclusions
- ◆ No dollar limits on evacuations, no deductibles, no co-pays, no claim forms

### Medjet, your ticket home in a medical emergency

# 1,500,000 heart attacks afflict Americans every year all over the world.

I am one in 1,500,000.

It was hot that day. It tends to get that way deep in the jungles of Zimbabwe. But I started feeling cold and clammy. Out of nowhere the pain gripped me and crushed down heavy on my chest. I hit the ground hard. When I finally came to, we headed toward civilization. My guide contacted the medical air rescue plane and then I instructed him to call MedjetAssist. The MedjetAssist team communicated with the air rescue crew as the plane made its

way in our direction. MedjetAssist assessed my location and condition and went to work to pinpoint the closest and most qualified heart specialists. My heart stopped just as the medics were landing. They tell me I died. They brought me back to life. I was rushed to the best private cardiac center in Johannesburg where MedjetAssist had secured a private room for me. During my intense treatment, MedjetAssist was in constant contact with my family. Once I was stabilized, they arranged for me to be safely transported home with a doctor and nurse at my side.

---

*Every year, about 1.5 million Americans go into cardiac arrest. Too many of them die because they don't get the critical help they need in time. Thanks to MedjetAssist, I am one of the ones who lives on.*
